

MISSION STATEMENT

Our mission at Burbank Water and Power (BWP) is to provide electric and water services to our customers in a safe and reliable manner while providing stable and competitive rates.

ABOUT BURBANK WATER AND POWER

The **Power Supply Division** is responsible for BWP's supply of electricity. The Division develops, operates, and builds facilities for the generation and delivery of energy to Burbank. The Division acquires power from a diverse number of resources including wind, solar, hydro, natural gas, coal, and nuclear-using facilities throughout the West. Much of the development is done through the Southern California Public Power Authority (SCPPA) for better economics. The City of Burbank has a resource goal to produce 33 percent of its electrical energy from renewable energy resources with a minimum rate impact; this has been a standing policy of Burbank since June 2007. The Division operates the Magnolia Power Project (MPP), a SCPPA project located at the BWP site, the Tieton Hydropower Project, a SCPPA project located in Washington state, as well as BWP local generation. The Division conducts the City's wholesale power marketing efforts to minimize the cost of power through energy sales to other energy companies.

The **Electric Services Division** is responsible for the planning, engineering, construction, testing, operation, and maintenance of electric stations, power lines, service drops, and meters. This Division also improves and maintains the City's street lighting system (Fund 129), maintains electrical facilities for power plant and water facilities, and installs fiberoptic lines.

The **Water Division** is responsible for the planning, engineering, construction, operation and maintenance of the City's potable water production, treatment, boosting, storage, and the distribution facilities for both the potable and recycled water systems. The distribution facilities include water mains, services, meters, valves, and fire hydrants. The Division acquires 80 percent of its potable water (both treated or untreated) from the Metropolitan Water District of Southern California.

The **Customer Service Division** provides customer assistance related to all municipal services accounts, including requests for new service, general account, billing and payment information. This Division also provides community support and educational outreach focusing on water and energy conservation, environmental stewardship, and the community's youth.

The **Finance Division** is responsible for financial planning and analysis, financial reporting, budgeting, energy risk management, ratemaking, ensuring access to capital markets, and accounting and reporting for the Magnolia Power Project and Tieton Hydropower Project. The Division is also responsible for the internal controls for BWP, which ensure the integrity of financial information regarding department operations and support operations for the other divisions including warehousing and fleet maintenance.

The **Technology Division** oversees security, telecommunications, operations technology, fiber services, and the systems modernization program for the utility. This Division operates and maintains the City's radio and telephone systems (Fund 535) and all physical and cyber security for the utility, including aspects of NERC-CIP (North American Electric Reliability Corporation - Critical Infrastructure Protection) compliance. The Division manages BWP's mission critical and a fiber-optic communications systems and networks within the City, which includes ONE Burbank, an enterprise fiber optic service provider.

2013-14 WORK PROGRAM HIGHLIGHTS

- Completed over 400 Green Home House Call program projects. This program provided extensive energy and water saving services free of charge to Burbank residents, including: attic insulation, air conditioning tune-ups, installation of energy and water saving devices, and leak detection.
- > Completed implementation of a new Municipal Services Billing System (Customer Information System).
- > Continued implementing the Recycled Water Master Plan with emphasis on customer conversions and connections. Ten parks, schools and other major users were connected to the system.
- > Converted 2.2 percent (about 3 MW) of 4,000 volt distribution feeders to 12,000 volts to reduce losses and improve reliability.
- > Continued implementing electric system technology enhancements to improve electric system reliability and efficiency, implemented energy saving technologies, and incorporated into services new renewable energy sources.

2014-15 WORK PROGRAM GOALS

- > Enhance the Green Home House Call program with additional measures, including the installation of low-flow toilets and measures co-sponsored by the Gas Company.
- > In response to California's drought, through a variety of programs, reduce water consumption in Burbank by ten percent over current goals.
- ➤ Continue implementing the Recycled Water Master Plan, with emphasis on customer conversions and recycled connections, including connections at schools (Edison, Disney, Jordan, Jefferson, Monterey, Stevenson, Providencia and Burbank M.S.) and other commercial properties.
- ➤ Build onsite a material handling area for covered storage of dirt, sand and gravel and for handling of used transformers containing waste oil.
- ➤ Provide fiber optic connectivity to five Burbank schools (Luther, Stevenson, Roosevelt, Emerson, and Edison) to enable high speed broadband capability.
- > Convert three percent (4 MW) of 4,000 volt distribution feeders to 12,000 volts to reduce losses and improve reliability.
- ➤ Install four additional public access Electric Vehicle Chargers, including two Level III fast chargers and 2 Level II chargers.
- > Complete Electric Distribution Master Plan to provide reliable electric service at the least long-term cost to customers.

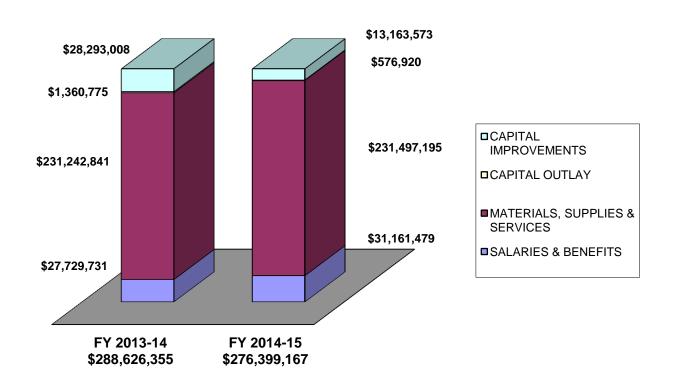

The Electric Fund supplies and distributes to the City of Burbank and its consumers electricity that is reliable, sustainable and cost efficient. The Electric Utility strives to keep rates competitive, while providing sufficient funding for operations and maintenance, including covering the rising costs of energy and providing funds for system reliability and capital improvements.

The Water Fund supplies potable and recycled water to the City of Burbank and its customers. The Water Utility is committed to providing safe drinking water reliably at competitive rates, promoting sustainability, and drought proofing a portion of the water supply by investing in the Recycled Water System.
